

TRAUMA SYSTEM ISSUES OF CONCERN:

Trauma Resuscitation Roles

- Well defined Physician and Nursing Leadership
 - This should be done before the patient arrives into the trauma bay.
- Define Nursing roles and expectations of the Trauma Team
 - Again, this should be done before the patient arrives to the trauma bay. This will help cut back on confusion during the treatment of your critical patient.
- Team Member Identification to the Trauma RN (Scribe)
Clear-cut Team Roles that identifies who is and is not part of the Resuscitation Team
- Good Team Communication- Necessary to cut back on chaos and confusion in the trauma bay.
- Crowd Control / Noise Control
Physician and Nurse Leadership have the authority to dismiss observers from the room
- Develop a user friendly format for observer relocation, prevent hurt feelings
