OPERATING POLICY

GUIDELINES FOR MEDICAL STUDENT SUPERVISION DURING PATIENT CARE EXPERIENCES

The school of medicine curriculum committee has adopted the following guidelines for medical student supervision.

1. Course/clerkship directors and department designee are responsible for ensuring student and patient safety during patient care activities.
2. Course and clerkship directors and department designee must inform students of the expectations for their participation and supervision in patient care.
3. Course/clerkship directors and department designee are responsible for assigning students to designated faculty and resident supervisors for all patient care experiences and for ensuring that faculty, residents, and students are notified of these assignments.
4. Medical students on duty for patient care activities must be directly supervised by qualified faculty and/or resident physicians at all times. Direct supervision implies a physician is either physically present with a student or is on duty and rapidly available to provide personal supervision.
5. Students on duty must have rapid and reliable systems for communicating with their supervising faculty and resident physicians.
6. The degree of direct supervision shall vary according to the clinical task and status of each patient, and be commensurate with each student's level of training, education and clinical experience.
7. Supervision should foster progressive responsibility and provide opportunities for students to demonstrate increasing independence when appropriate.

8. Course/clerkship directors and department designee are responsible for determining the types of patient interactions and the clinical procedures that medical students can perform during patient care experiences and the levels of direct supervision required for these interactions and procedures. Clerkship directors will provide faculty, resident physicians and students with a list of the types of patient interactions and the clinical procedures that students may perform and the level of direct supervision required for each of them.
9. Course/clerkship directors and department designee will stratify the types of student-patient interactions and clinical procedures that may be performed by medical students according to the potential risk incurred by the student and patient. The level of supervision required for each procedure must be adequate and appropriate for the potential level of risk.
10. Course/clerkship directors or departmental designee are responsible for providing the list of procedures allowed by medical students to faculty physicians, resident physicians, and the students on each clinical service.
11. A supervising physician may delegate some medical student teaching and supervising responsibilities to non-physician care providers after ensuring the non-physician providers are appropriately credentialed and working within the scope of their practice.
12. Physician supervisors should provide students with proximate and constructive feedback related to problem areas that are encountered during direct patient care experiences.
